May 4, 1999

Dear Sir:

Our Fire Department purchased an Evac -U-Splint last year from your company. We have used this splint numerous times and are extremely pleased with this product. Most of the uses have been for elderly patients who have fallen in their homes and these patients have been transported in much more comfort than they would if an ordinary backboard had been used. Most have commented that they were comfortable on this splint. In one case, due to the small area the patient was lying in, we would have been unable to get a regular backboard in to the patient, but the evac-u-splint worked perfectly. Everyone who sees this product in use is amazed.

I thought I would write and let you know that Prichard Volunteer Fire Department is very pleased with this product.

Sincerely yours,

Janet Scott  
EMS Captain
